Commercial Real Estate Market Summary for Benton and Washington Counties

This report is the fortieth edition of the Skyline Report for Benton and Washington Counties—Commercial Real Estate Market Analysis. Researchers at the Center for Business and Economic Research in the Sam M. Walton College of Business at the University of Arkansas produce the Skyline Report to provide timely statistical analysis of the Northwest Arkansas commercial real estate market. The information contained in the Skyline Report is critical for lenders, developers, contractors, and potential lessees. The Northwest Arkansas commercial real estate market is fragmented with many local and national commercial real estate professionals competing to serve the needs of a burgeoning business community. Having current information and analysis provides a competitive advantage over those who make decisions without the benefit of hard data.

Highlights from the Second Half of 2018

- In the second half of 2018, there was 351,272 square feet of positive absorption, while 333,306 new square feet were added, leading to net positive absorption of 17,966 square feet in the Northwest Arkansas market and an overall vacancy rate of 10.9 percent, up from 10.8 percent in the first half of 2018.
- 136,394 new square feet were added in the office submarket, while 201,456 square feet were absorbed, leading to net positive absorption of 65,062 square feet in the second half of 2018. The office vacancy rate decreased to 8.4 percent from 9.1 percent in the first half of 2018.
- Within the retail submarket, there was overall negative absorption of 51,367 square feet, while 28,075 new square feet entered the market, leading to negative net absorption of 79,442 square feet. The retail vacancy rate increased to 11.5 percent in the second half of 2018 from 9.7 percent in the first half of 2018.
- The warehouse submarket had overall negative absorption of 84,388 square feet, while 88,265 new square feet were added in the second half of 2018, leading to a negative net absorption of 172,653 square feet. The Northwest Arkansas warehouse vacancy rate increased from 8.1 percent in the first half of 2018 to 9.9 percent in the second half of 2018.
- In the office/retail submarket, there was net negative absorption of 2,343 square feet, while no new square feet of office/retail space entered the market in the second half of 2018. The vacancy rate decreased from 11.7 percent in the first half of 2018 to 10.9 percent in the second half of 2018.
- From July 1 to December 31, 2018, there were \$196,590,916 in commercial building permits issued in Northwest Arkansas. In comparison, there were \$190,109,255 in permits issued in the first half of 2018.

Report Structure

The Skyline Report presents an analysis of data from three primary sources. Information on the entire population of commercial property is gathered from the offices of the Benton and Washington County Assessors. These data sets are then filtered to exclude properties that are not part of the competitive leasing market. These excluded properties include owner-occupied buildings and other dedicated spaces. Additionally, commercial properties that do not meet certain minimum size criteria (detailed on page 56) are also filtered from the base of commercial properties considered. As a second source of data, building permit information is collected from the relevant divisions in Northwest Arkansas city governments. Finally, availability, lease rates, and other characteristics of competitive commercial properties are obtained from a panel of the largest commercial property owners and managers in Northwest Arkansas. Each of the three types of information that is collected gives a unique but critical perspective of the local commercial property market. Without understanding what the universe of commercial properties looks like at the beginning of a period, the scale of available space for lease is meaningless. Likewise, the data that come from building permits paint a picture of what market additions are imminent. Only after setting the stage with these two perspectives do vacancy rates and market absorption numbers have real value. For the second half of 2018, the city of Johnson and office/warehouse, retail/warehouse, and warehouse space in Tontitown, which was integrated into Springdale, were added.

In order to provide yet another level of perspective on the Northwest Arkansas commercial property market, the Skyline Report contains an overview of national and regional macroeconomic conditions. Ultimately, the real estate market is subject to the same fundamental forces that shape the rest of the economy, so having a broader view of current issues provides insights into potential challenges and opportunities for commercial property development.

To this end, the Skyline Report begins with an economic overview. First, national output and employment issues are discussed, followed by the discussion of short-term and long-term interest rate prospects. Then, recent regional economic statistics, focusing on regional employment trends, are presented. After the economic overview, the results of some focus group discussions with commercial property developers and managers are summarized in order to supplement the hard data with anecdotal evidence from market participants about regional trends.

After the summary of local perceptions, the second half of 2018 numbers for total commercial property square feet and building permit data are presented. Within the total square feet table, a breakdown of property type by city is provided. Also, the square footage of competitive commercial property for which the 237 panelists provide information is broken down by city and the percentage of coverage of the competitive market is calculated. A table containing publicly announced new commercial real estate projects is presented after the summary of building permit data. This table is meant to provide an indication of the future direction of the Northwest Arkansas commercial property market. As many of these projects are still in the conceptual phase, hard data is incomplete and subject to change. This period, the announced data was examined particularly closely. Project locations were checked and developers were contacted regarding the projects from the previous Skyline report.

Following the tables of announced commercial projects, hotels, and restaurants is a trend summary that includes information about vacancy rate and available space trends. There are also three tables summarizing the results from the most recent time periods. The first table presents vacancy rates by sub-

market for the second half of 2017, and both the first half of 2018 and the second half of 2018. The second table presents net absorption by submarket and the third table presents available square footage by submarket for the same time periods. These tables are the foundation for the performing trend analysis and for separating the seasonal effects from real effects. The results in the tables are referred to throughout the remainder of the Skyline Report.

The next four sections present analyses of Northwest Arkansas submarkets by type of space. The office submarket is examined first, followed by the office/retail, retail, warehouse, office/warehouse, and retail/warehouse submarkets. Following these sections are commercial property summary statistics by city. There are sections for Bella Vista, Bentonville, Fayetteville, Johnson, Lowell, Rogers, Siloam Springs, and Springdale.

Finally, a section on how to interpret the numbers contained in the report and a description of the commercial property classification system are offered.

By aggregating and analyzing data from a variety of sources, the Skyline Report is unique in its perspective on the Northwest Arkansas commercial property market. The information should be useful to anyone with an interest in the current workings and projected course of commercial real estate in Benton and Washington Counties.

Economic Overview

It is helpful to look at some key macroeconomic statistics in order to get a sense of the Northwest Arkansas commercial real estate market. The rate of activity in the Northwest Arkansas commercial real estate market is dependent upon two general factors: those that are specific to the region and those that are national in nature. The following discussion highlights some of the statistics that indicate the direction of the macro economy.

Gross Domestic Product

In the third quarter of 2018, real GDP increased by 3.4 percent according to advance estimates released by the U.S. Department of Commerce's Bureau of Economic Analysis (BEA). Real GDP increased by 4.2 percent in the second quarter of 2018. The increase in real GDP in the third quarter reflected positive contributions from personal consumption expenditures (PCE), private inventory investment, nonresidential fixed investment, federal government spending, and state and local government spending that were partly offset by negative contributions from exports and residential fixed investment. Imports, which are a subtraction in the calculation of GDP, increased. The deceleration in real GDP growth in the third quarter primarily reflected a downturn in exports and decelerations in nonresidential fixed investment and in PCE. Imports increased in the third quarter after decreasing in the second. These movements were partly offset by an upturn in private inventory investment

Employment

The Northwest Arkansas employment situation is extremely important to the health of the real estate market. The most recent data show that employment in the Northwest Arkansas region was at 261,700 in December 2018, up 2.0 percent from December 2017. According to the U.S. Bureau of Labor Statistics (BLS), the unemployment rate in Northwest Arkansas was at 2.5 percent in November 2018, similar to the unemployment rate in November 2017. The unemployment rate has remained under 4.0 percent since August of 2015. The unemployment rate in Northwest Arkansas continues to be lower than both the state (3.3 percent) and national (3.5 percent) unadjusted rates.

Northwest Arkansas Employment by Sector - December 2018

Source: Bureau of Labor Statistics

Economic Overview

With the purpose of exploring more closely the composition of job growth in Northwest Arkansas, two additional figures (on the previous page) are provided. The first shows the December 2018 Fayetteville-Springdale-Rogers MSA employment breakdown by sector. As the pie chart shows, trade, transportation, and utilities, and government had the largest share of employment (22 percent) in Northwest Arkansas followed by professional and business services (19 percent), government (14 percent), manufacturing (12 percent), education and health services (11 percent), and leisure and hospitality (10 percent). The other figure shows the annual percentage change in the metro area's employment by sector from December 2017 to December 2018. Total nonfarm employment increased by 2.0 percent during that time. Employment in construction, government, education and health services, and manufacturing sectors grew more quickly than 2.0 percent. Leisure and hospitality, other services sector, the trade, transportation and utilities sector, and professional and business services grew slower than 2.0 percent while the financial activities sector and information sector remained unchanged.

Interest Rates

The Federal Funds rate averaged 2.27 percent in December 2018. The ten-year constant maturity Treasury bill had an interest rate of 2.83 percent in December 2018, up from 2.40 percent in December 2017. The positive spread between the ten-year rate and the federal funds rate narrowed from a year ago, but remains positive as both rates have increased. The Federal Reserve Open Market Committee decided to increase the target range for the federal funds rate from 2.25 to 2.50 percent. The stance of monetary policy remains steady, it is supportive of further improvement in economic and labor market conditions along with sustained 2 percent inflation. The accompanying figure shows the Federal Funds rate and the thirty-year mortgage rate since December 2008. The 30-year mortgage rate was 4.64 percent in December 2018.

Selected Interest Rates

Local Perceptions

Local Perceptions of the Northwest Arkansas Commercial Property Market

In each reporting period, Center for Business and Economic Research staff members discuss market conditions with some commercial developers and/or property managers to gain insights into the current commercial real estate market in Benton and Washington counties. In the second half of 2018, respondents continued to express positive feelings about the commercial real estate market, and continued to push forward on new projects scheduled to break ground in 2019. However, respondents were concerned about slower absorption of new and planned construction in the office market in 2020 after the current round of projects are completed. Most panelists reported continuing strong demand for Class A and B office space, medical office space, office/warehouse space and office/retail space, and retail space in high-demand locations. Expansions in the vendor eco-system, including the rumored WeWork entrance into Northwest Arkansas, the creation of more ‘communal work space’ is driving the demand for Class A office space. The need for large floor plan space, over 20,000 square feet, was mentioned several times. Respondents continued the discussions about areas with strong Class A office space demand and access to the trail system drawing in mixed use developments that promote the concept “live, work, play”. Several indicated that building trail access was necessary for these mixed use developments to have a greater chance of succeeding. In addition to the Pinnacle area, downtown Bentonville, and west Springdale, several respondents talked about new Class A office space

also being built in Fayetteville, mostly in Uptown Fayetteville. Some of the demand for Class A office space continues to be pushed by firms willing to move up from Class B to Class A space, to compete for worker talent. The shrinking workforce at some vendor offices is also causing shifts from low-lease rate large office spaces to high-lease rate smaller office spaces. Respondents said the Class B office market is still healthy, as the lower lease rates provide cost-sensitive smaller firms, people moving out of their home offices, and startups, a decent space for offices. Panelists discussed how vendor parks are upgrading their spaces, increasing lease rates slowly, but still taking advantage of the price gap between Class A and B space. New Class B space being developed in Bentonville, Rogers, and Fayetteville is expected to be leased at around \$20 a square foot. The health of the medical office submarket was also highlighted by most of the panelists. In fact, some panelists believe the growth of the medical office submarket is going to accelerate in the coming years.

During the second half of 2018 conversations, several respondents discussed the overall softness in the retail market. These conversations mirrored national trends, with older retail space having issues but newer space in higher income areas showing some growth. Panelists still feel that retail in Northwest Arkansas remains viable in high-demand locations. Respondents felt that the current high-demand locations in Northwest Arkansas were downtown Bentonville, the Pinnacle area and Pleasant Crossing in Rogers, West Springdale, and the Mission and Crossover area and Martin Luther King Boulevard in Fayetteville. Several also believe that downtown Rogers and downtown Springdale have potential to become high demand areas for new activity. Panelists reiterated that restaurants, nail salons, and other personal service business

continue to be the drivers in the market for new retail spaces in high-demand locations. A few panelists mentioned restaurant labor shortages as being a potential barrier to the restaurant market being able to keep expanding rapidly in Northwest Arkansas.

Panelists with expertise in the warehouse market remain in disagreement about whether the market needs significant new warehouse space. On the one hand, some respondents felt that there was demand for new 30-foot Class A warehouse space in Northwest Arkansas. Others pointed to the vacancies that occurred during this time period as a reason new construction is not needed yet. Still, there was little concern about overbuilding in the warehouse market as there are so few players in Northwest Arkansas. The building of new office/warehouse and retail/warehouse space, priced at \$7 per sq. ft. or over, by several builders now, is being followed with interest in a submarket that has very strong demand and low supply. Respondents remain unsure if enough tenants could afford to pay the higher lease rates being sought by the all the newly constructed properties. More climbing facilities, office space, and more dedicated showroom space were all talked about. Some panelists continue to mention that the growth of retail e-commerce in Northwest Arkansas could lead to development of new distribution warehouses.

The perspective of respondents involved in residential and multifamily markets was that while demand remains strong, they are working hard to maintain an attractive inventory across price points. One high-end home builder was worried about potential softness in the market for homes priced over \$400,000, and this concern was beginning to be shared by other panelists. Another point made was that homes were

Local Perceptions

not selling as quickly before construction was finished, and apartments were not preleasing as fast either. Respondents hope that the continued growth in the Northwest Arkansas population will allay concerns about overbuilding in the residential market. Concerns about construction costs remained strong. Some respondents were concerned about cities imposing more design standards on new homes and its potential impact on affordability. There was a lot more discussion about the potential for overbuilding in the multifamily market given the growth in the mixed-use developments across Northwest Arkansas, even though vacancy rates declined in the region. In particular, respondents expressed some concerns about the student by-the-bed projects in Fayetteville and apartment complexes in Bentonville and Rogers. However, respondents felt that first-movers and developers with the right amenity-rich locations were expected to continue to succeed.

Concerns about increasing construction costs and labor shortages and their impact on lease rates and sale prices, were echoed by every panelist during the second half of 2018 conversations. More respondents thought that the construction of the new Walmart Home office would stoke future demand for labor and construction resources. As a result of these higher construction costs, respondents stated that Class A office and retail lease rates would need to be priced around \$30 per sq. ft., large warehouse space over \$5 per sq. ft., and office/warehouse and retail/warehouse would need to be priced over \$7 per sq. ft. Respondents pointed out that new Class B office space leased at around \$20 per sq. ft., would need to have efficient construction and low land costs. Respondents continued to discuss the impact of high-net worth individuals investing in Northwest Arkansas, as the properties held by high-net worth individu-

als were seen as less likely to face bank foreclosure during economic downturns. These panelists were concerned about overbuilding by these investors, and that these properties might exert downward price pressure and affect the viability of other projects that were leveraged. Respondents strongly believe the investments made by the Walton Family Foundation across Northwest Arkansas are having powerful impacts upon downtown core areas, as other builders and developers continue to piggyback upon these initial investments. Respondents continued to discuss the need for thoughtful, well planned development to address the need for residential density in downtown areas that caters to different income levels. Panelists reflected on the trail system being monetized even further as they discussed building trail spurs into new office, retail, and multifamily developments. The overall tone continued to be positive as respondents continued to foresee growth opportunities in Northwest Arkansas. Respondents remain excited about the continuing expansion of the trail system and bike infrastructure connecting Northwest Arkansas, as well as other regional amenities including a growing fine dining scene, new ethnic restaurants, additional entertainment venues like Top Golf, and various climbing and trampoline facilities. As always respondents mentioned that a strong sense of stability in the region was provided by the major economic drivers like, Walmart and the Walton Family, the University of Arkansas and the education sector, J. B. Hunt, and the transportation sector, and Tyson Foods and the food industry sector. The medical and health care sectors were mentioned even more this period as strong long-run growth areas, and several panelists continue to feel Northwest Arkansas is in a long period of commercial building in this submarket.

Panelists continue to mention a potential for an economic slowdown in the future, however, the timeframe varies with expectations of a slowdown being pushed to late 2019 at the earliest and 2022 at the latest. The consensus remains that a potential downturn will be relatively mild especially compared to the Great Recession.

Positive Factors:

- Continued population growth in the MSA.
- Construction of the new Walmart Home Office.
- Growth of existing businesses creating demand for new Class A office space.
- Growth in the healthcare sector creating demand for new Medical Office space.
- Development of mixed use live-work-play communities.
- Leveraging the trail system as a selling point for commercial space.
- Continuing creation of amenities in Northwest Arkansas.
- Increasing attention to the MSA by national investors.
- Continuing media coverage of Northwest Arkansas as a good place to work and live.

Negative Factors

- Increased construction costs and skilled labor shortage.
- Impact of Walmart Home office on construction costs.
- Lease rate increases outpacing small firm's ability to pay.
- Potential overbuilding of Class A office by the beginning of 2020.
- Shift to work stations leading to less office demand.
- Overhang of existing class B and C retail space.
- Overbuilding of the student housing market around the University of Arkansas.
- Possible overbuilding of nonstudent multifamily housing in Benton County.
- Infrastructure costs.

Inventory and Building Permits

Categories of Commercial Properties

The Northwest Arkansas commercial market is divided into eight major categories of space:

Lab – a workplace for conducting scientific research;

Industrial—space that is appropriate for the manufacturing of goods;

Office—space where business professionals work;

Office/Retail—space that can be configured as either office or retail space or both;

Office/Warehouse—space that can be configured as either office or warehouse space or both;

Retail—space where goods and services can be offered and sold to the public;

Retail/Warehouse—space where goods and services can be offered, sold, and stored;

Warehouse—space where goods can be stored until distributed.

Further, analysts at the Center for Business and Economic Research have classified individual office, office/retail, retail buildings, and warehouse into three categories: Class A, Class B, and Class C. A description of the methodology used to classify buildings is included at the end of this report. Class A space is the highest quality space available in the Northwest Arkansas market. Class B properties encompass a wide range of spaces, which have lease rates that cluster around the market average. Finally, Class C space describes properties that have sub-average lease rates and amenities.

Local Commercial Property Inventory and Building Permit Data

The table on the following page presents the total competitive commercial property inventory in Northwest Arkansas that meets minimum square footage requirements as

of December 31, 2018. For the second half of 2018, the Skyline Report covered 100.0 percent of the total competitive commercial property population in Northwest Arkansas. Some cities had more complete coverage than others.

Building permit data from the past ten years is presented for six major cities in Northwest Arkansas. Building permit data are seasonal in nature and show large fluctuations in square footage and value from quarter to quarter. Moreover, any particularly large project can skew the numbers immensely. Building permit data are also city-specific. Only the cities of Bentonville, Fayetteville, and Siloam Springs present square footage data, while only Bentonville and Fayetteville break out the different types of commercial property. A standardization of building permit applications in the region would provide superior data for comparison purposes.

From July 1 to December 31, 2018, there were just over \$196.5 million in commercial building permits issued in six major cities in Northwest Arkansas, Bentonville, Fayetteville, Johnson, Lowell, Rogers, Siloam Springs, and Springdale. In the third quarter of 2018, just over \$108.1 million in commercial building permits were issued.

In the fourth quarter, just over \$88.4 million in building permits were issued. In the second half of 2018, Bentonville again had the greatest share of building permits with 28.1 percent. Rogers followed with 20.3 percent, then Fayetteville with 18.0 percent, and Springdale with 17.7 percent. Lowell, Johnson, and Siloam Springs accounted for 14.0, 2.0, and less than 0.1 percent, respectively.

A table of announcements of new commercial projects is included as an indication of the future direction of the Northwest Arkansas commercial market. The list is not exhaustive, but represents an effort to gather data at a step before the official permitting process. The managers and owners of many of these properties have provided the Center for Business and Economic Research with information about these buildings, but until construction is complete, they do not appear in the aggregated total square footage and available square footage calculations. Some of the properties listed are actually under construction, while others are only in the concept phase. The Center researchers examined the announced data closely this reporting period and project locations were checked and developers were contacted regarding the projects from the last Skyline

Inventory

report. The conceptual category means that the developer still feels the project is viable, but there are many uncertainties regarding funding, leasing, timing, etc., which results in an undetermined timeline.

Following the announced properties table is a list of the existing hotel properties in Northwest Arkansas, detailed by city. In the second half of 2018, there were 6,379

standard rooms and 2,335 suites in Northwest Arkansas. Bentonville had the most standard rooms with 1,865 while Rogers had the most suites with 963. Additionally, graphs that describe the development of hotels in Northwest Arkansas over time are provided below the hotels list. Announced new hotel properties are detailed in a table following the existing hotel properties. Re-

spondents continue to feel that Northwest Arkansas can slowly absorb several more 100 - 200 bed hotels, in the proper locations, but the market is not ready for another large hotel. Finally, lists of announced new and closed restaurant properties follow the hotel information.

Total Square Feet and Coverage of Competitive Commercial Properties

	Industrial ¹	Office ¹	Retail ¹	Warehouse ¹	Total ¹	Panel Total Square Feet ²	Panel Coverage ²
Bella Vista	--	129,924	242,600	90,964	463,488	426,623	92.0%

Commercial Market Trends

This version of the Commercial Skyline Report presents data that have been collected since 2007. Annual comparisons are made to minimize the effects of attributing too much weight to seasonal changes. The accompanying graphs show how vacancy rates and available square footage have changed in each submarket over the past twelve years. Also, a table presents the total absorption over the past year by city and submarket. The following three pages have tables with more detailed information about vacancy rates, net absorption, and available space. Additionally, the city of Johnson, and the Tontitown office/warehouse, retail/warehouse, and warehouse were added to the Northwest Arkansas data base.

Available office square footage in Northwest Arkansas decreased from 1,051,781 square feet in the second half of 2017 to 1,040,066 square feet in the second half of 2018. In the past year, 174,212 new square feet of office space were added, with Rogers having the most with 72,662 square feet, Bentonville adding another 58,867 square feet. There was net positive absorption of 83,898 square feet of office space in Northwest Arkansas during the past year. Rogers accounted for the greatest amount of net positive absorption with 32,977 square feet, while Bentonville accounted for another 20,889 square feet. The overall Northwest Arkansas office vacancy rate declined by 0.7 percent from 9.1 percent to 8.4 percent, from the second half of 2017 to the second half of 2018.

In Northwest Arkansas, 469,221 square feet of office/retail space were available in the second half of 2018, up from 388,426 square feet in the second half of 2017. The office/retail market experienced net negative absorption of 120,831 square feet in the past year. Rogers accounted for the most with 104,393 square feet of the negative net absorption over the past year. Fayetteville had and additional 21,178 square feet of negative net absorption. Bentonville had positive net absorption of 16,794 square feet during this period. There was 11,043 new square feet of office/retail space added within the past year, with Rogers accounting for 9,000 square feet, and Fayetteville 2,043 square feet. The overall Northwest Arkansas office/retail vacancy rate increased 2.0 percentage points from 8.9 percent in the second half of 2017 to 10.9 percent in the second half of 2018.

In the second half of 2018, 1,171,517 square feet of retail space were available in Northwest Arkansas, up from 871,707 square feet in the second half of 2017. The retail market had net negative absorption of 169,468 square feet

Commercial Market Trends

in the past twelve months. Fayetteville accounted for 173,828 square feet and Rogers added another 40,179 square feet of negative net absorption. Springdale had 39,237 square feet of positive net absorption during this time period. There were 105,075 new square feet of retail space added to the Northwest Arkansas market during the past year, with Rogers accounting for 28,738 square feet, while Fayetteville and Bentonville accounted for 28,000 square feet and 20,837 square feet, respectively. The overall Northwest Arkansas retail vacancy rate increased 2.6 percentage point from 8.9 percent in the second half of 2017 to 11.5 percent in the second half of 2018.

In the Northwest Arkansas warehouse market, available square footage increased from 534,307 in the second half of 2017 to 1,004,613 in the second half of 2018.¹ The warehouse market experienced negative net absorption of 382,988 square feet during the past year. Lowell accounted for 322,185 square feet of the negative net warehouse absorption, Rogers and Fayetteville had another 79,673 and 54,465 square feet of negative net absorption, respectively, while Bentonville accounted for 41,000 and Springdale 27,435 square feet of positive net absorption in the last year in the warehouse market. 88,265 square feet of new warehouse space were added to the Northwest Arkansas market during the past year, with Bentonville accounting for all the new square feet. Vacancy rates increased by 4.1 percentage points from 5.8 percent to 9.9 percent over the same period.

¹ Respondents indicated that the previously mentioned 250,000 square feet of quality, leased warehouse space is no longer available for sublease in Rogers.

Retail

In the second half of 2018, the retail properties included in the Skyline Report panel had a vacancy rate of 11.5 percent, up from 9.7 percent in the first half of 2018. Of the 10,180,033 square feet of Northwest Arkansas retail properties examined, 1,171,517 square feet were available. 28,075 square feet of new retail space were added in Northwest Arkansas. There was negative net absorption of 79,442 square feet in the second half of 2018.

In the second half of 2018, Fayetteville had a retail vacancy rate of 11.8 percent, up from 10.8 percent in the first half of 2018, with 441,881 available square feet out of a total of 3,748,757. No new square feet were added and there was reported negative net absorption of 20,051 square feet in the Fayetteville retail market in the second half of 2018.

The Rogers market had 402,581 square feet of available retail space out of a total of 3,465,927 square feet, for a vacancy rate of 11.6 percent in the second half of 2018. This was an increase from the 6.9 percent rate in the first half of 2018. 12,238 square feet of new retail space were added in Rogers, contributing to a negative net absorption of 60,774 square feet. Reclassification of a significant amount of commercial space into the retail submarket in Rogers contributed to the changes from the first half 2018.

Bentonville had 752,166 total square feet and 79,733 available square feet of retail space in the second half of 2018, resulting in a vacancy rate of 10.6 percent. This represented an increase from the rate of 10.3 percent in the first half of 2018. 15,837 square feet of new retail space were added to the Bentonville market which had negative net absorption of 2,710 square feet.

There were 166,997 square feet of available retail space out of a total of 1,595,370 square feet in Springdale in the second half of 2018. This implied a vacancy rate of 10.5 percent, down from 12.0 percent in the first half of 2018. No new square feet of retail space were added during the second half of 2018, and there was positive net absorption of 11,666 square feet.

Retail

In the Class A retail submarket Fayetteville had the highest average reported lease rate at \$25.00. Rogers had an average reported lease rate of \$21.83, after an increase of \$0.09. Springdale, with a growing sample size, had an increase of \$2.50 to \$24.00 in the second half of 2018. The average rate in Bentonville decreased slightly to \$20.97. After an increase of \$0.98 Class B retail average lease rates were highest in Bentonville at \$16.29. Fayetteville increased to \$15.67, Rogers increased \$0.14 to \$13.84, and Springdale was the lowest at \$13.49. Class C average reported lease rates remained the highest in Bentonville at \$12.24 after increasing \$0.59. Fayetteville was at \$10.30, Rogers was at \$9.75, leaving Springdale the lowest at \$9.19 in the second half of 2018.

Warehouse

Warehouse

This is the fourth half that CBER staff has classified warehouse space into Class A, B, and C. Local experts were consulted ahead of time as CBER staff developed standards for classification based on height, construction materials, docks, courtyards, sprinklers, and location. During the classification process some properties were identified as having had their functions changed and were reclassified into the office/warehouse or retail/warehouse categories.

In the second half of 2018, the warehouse properties included in the Skyline Report panel had a vacancy rate of 9.9 percent, up from 8.1 percent in the first half of 2018. Of the 10,155,966 square feet of warehouse space examined, 1,004,613 square feet were available. There was 88,265 new square feet of warehouse space added in the second half of 2018, and there was negative net absorption of 172,653 square feet.

Bentonville had 1,261,937 total square feet of warehouse space and 78.0 percent of it was Class A warehouse space. 113,034 square feet of warehouse space, of which 101,200 square feet was Class A, was available in the second half of 2018. 88,265 new warehouse space was added to the Bentonville warehouse submarket in the second half of 2018, resulting in a vacancy rate of 9.0 percent down from 12.4 in the first half of 2018. There was positive net absorption of 33,000 square feet in this report period.

There was 1,232,499 total square feet of warehouse space in Fayetteville in the second half of 2018 and 52 percent of it was Class B warehouse space. The vacancy rate was 9.3 percent, a decrease from 15.8 percent in the first half of 2018 as 114,465 square feet of warehouse space, all Class A, was available after positive net absorption of 80,000 square feet. The Class A warehouse submarket accounted for all of the positive net absorption.

410,360 square feet of warehouse space was available in Lowell out of 1,283,213 total square feet of warehouse space. 64.9 percent of the

Warehouse

total warehouse space was Class A. No new square feet of warehouse space were added to the Lowell submarket in the second half of 2018. After negative net absorption of 263,590 square feet, the resulting vacancy rate was 32.0 percent, up from 11.9 percent in the first half of 2018. 169,750 square feet of the negative net absorption was in the Class C warehouse market in the second half of 2018.

Rogers had 2,879,675 square feet of warehouse space², of which 50.8 percent is Class A. 241,5672 square feet was available and a majority of it, 187,563, was Class C space, leading to a vacancy rate of 8.4 percent, up from 7.0 percent in the first half of 2018. There was negative net absorption of 39,898 square feet, 24,498 square feet of it Class C, in the second half of 2018.

Springdale, which included Tontitown warehouse space from the second half of 2018, had 3,070,497 square feet of warehouse space, of which 50.8 percent is Class B. 97,547 square feet was available and over half of it, 75,547 square feet, was Class C space, leading to a vacancy rate of 3.2 percent, up

Warehouse Lease Rates Average Range by City

	Class A	Class B	Class C
Bentonville	\$4.92 - \$5.51	\$4.68 - \$4.93	--
Fayetteville	\$4.38 - \$4.38	\$3.46 - \$3.71	\$3.14 - \$3.31
Rogers	\$3.60 - \$3.60	\$4.75 - \$4.92	\$3.77 - \$3.98
Springdale	\$3.42 - \$4.25	\$3.56 - \$4.11	\$3.72 - \$4.16

from 2.5 percent in the first half of 2018. There was no new available space added to the Springdale warehouse submarket in the second half of 2018. There was a positive net absorption of 12,935 square feet, 19,204 in Class B, while Class C had negative net absorption of 6,269 in the second half of 2018.

The average reported warehouse lease rates increased by \$0.14 in Springdale, \$0.10 in Rogers and \$0.06 in Rogers. The lease rates decreased in Fayetteville by \$0.02. Bentonville continued to have the highest reported lease rate at \$5.08, in the second half of 2018. It is interesting to note that the highest lease rates are not necessarily in the Class A warehouse submarket. According to Skyline report respondents this is mostly due to economies of scale in the Class A submarket, which includes mostly large warehouse space, over 50,000 square feet.

² Respondents indicated that the previously mentioned 250,000 square feet of quality, leased warehouse space is no longer available for sublease in Rogers.

Springdale

Downtown Springdale

- Skyline Report panelists reported vacancy statistics, lease rate ranges, and other characteristics for 357,024 square feet of office, office/retail, and retail space in downtown Springdale in the second half of 2018. Some retail space was reclassified as office/retail space by respondents.
- There were no new square feet of commercial property added to downtown Springdale in the second half of 2018.
- There was a positive net absorption of 2,640 square feet in the office market in downtown Springdale in the second half of 2018. The office space in downtown Springdale had an average vacancy rate of 3.0 percent, lower than the 3.2 percent in the first half of 2018. The rate was lower than the overall Springdale average office vacancy rate of 5.7 percent.
- There was negative net absorption of 2,640 square feet. 31.2 percent of all reported office/retail space was avail-

able in downtown Springdale, down from the 76.9 in the first half of 2018. This compares to 11.7 percent vacancy rate for all of Springdale.

- Retail space in downtown Springdale had a positive net absorption of 4,140 in the second half of 2018. The vacancy rate decreased from 9.9 percent in the first half of 2018 to 6.6 percent in the second half of 2018, and was lower than the average retail vacancy rate for all of Springdale at 10.5 percent in the second half of 2018.
- Average reported lease rates for downtown Springdale remained relatively unchanged in the second half of 2018.

West Springdale

- Skyline Report panelists reported vacancy statistics, lease rate ranges, and other characteristics for 861,794 square feet of office, office/retail, and retail space in West Springdale in the second half of 2018. There were no new square feet of commercial space added to West Springdale in the second half of 2018.
- The office space in West Springdale had no net absorption in the second half

of 2018. The vacancy rate remained 10.2 percent, and was higher than the city average office vacancy rate of 5.7 percent.

- The office/retail submarket had a positive net absorption of 3,094 square feet in the second half of 2018. The vacancy rate in West Springdale was 23.4 percent in the second half of 2018, an increase from the 13.1 percent from the first half of 2018, as space was re-developed and reclassified. The rate was above the overall city average office/retail vacancy rate of 11.7 percent.
- The retail vacancy rate for West Springdale properties increased from 4.5 percent in the first half of 2018 to 4.7 percent in the second half of 2018, as there was negative net absorption of 2,163 square feet. The rate was below the city average retail vacancy rate of 10.5 percent.
- Average reported lease rates for West Springdale decreased \$0.39 in the office submarket, increased \$1.20 in the office/retail submarket, and increased \$3.04 in the retail submarket, as some space was upgraded and repriced in the second half of 2018.

Interpretation

The methodology that is used to produce the Skyline report has been designed to elicit the most useful, comprehensive, and up-to-date information available about the Northwest Arkansas commercial real estate market. Data comes from three primary sources that complement one another. Each source, however, has limitations, and as such, results should be compared and interpreted carefully.

The first level of data that the Skyline report contains comes directly from the offices of the Washington and Benton County Assessors. The Benton County Assessor Office uses Apprentice Information Systems as the subcontractor to handle data requests. On a semi-annual basis, Center for Business and Economic Research staff members acquire databases containing listings of all real estate parcels within each county. The information contained in these databases is sorted by type and by size. In order to determine the population of commercial properties of interest, properties that do not meet the following minimum criteria are eliminated from consideration:

Banks: 20,000 square feet
Department Stores: 20,000 square feet
Discount Stores: 20,000 square feet
Industrial Buildings: 20,000 square feet
Markets: 20,000 square feet
Office Buildings: 5,000 square feet
Medical Office Buildings: 5,000 square feet
Retail Buildings: 10,000 square feet
Community Shopping Centers: 5,000 square feet
Neighborhood Shopping Centers: 5,000 square feet
Warehouses: 20,000 square feet

Next, properties are individually examined to determine if they are part of the competitive commercial property market. Owner-occupied and other dedicated spaces are eliminated from the base of properties that the Skyline Report examines.

The second source of data that helps comprise the Skyline Report is building permit reports from the cities of Northwest Arkansas. This report period the city of Johnson

and the three types of warehouse space in Tontitown were added to the data base. Each city has its own reporting requirements for building permits, which makes in-depth comparisons on a city-by-city basis impossible. Bentonville and Fayetteville have the most comprehensive building permits, which include information on the square footage of buildings and their uses in addition to the value of the permit and identifying characteristics of the property. The other cities in Northwest Arkansas only report the building address, contractor name, and value of the permit. In general, property owner or developer names are not included on building permits in Northwest Arkansas. Building permits also do not provide any sense of the estimated time of completion of a project or availability for leasing.

The third source of data for the Skyline report is a panel of large commercial property owners and managers. These individuals are responsible for the bulk of the competitive commercial properties in Northwest Arkansas. The Center for Business and Economic Research staff gather information on square footage available to the market, lease rates, and other property characteristics from the panelists. In the second half of 2018, 237 panelists provided data on 2,085 competitive properties across Benton and Washington Counties. Data are excluded for owner-occupied and dedicated spaces so that the total square feet, available square feet, and lease rates represent only a sample from properties that are currently or potentially available for lease. Vacancy rates are calculated from the sample of 2,085 properties and are assumed to be representative of the larger competitive commercial property market.

The panel participants vary somewhat from report to report as new contributors are added and as previous contributors fail to respond for new requests for information. Time trend analysis is dependent on having a consistent base of information so that apples-to-apples comparisons can be made. Absorption rates are only calculated for properties that are part of a matched sub-sample—that is, there must have been information received about a particular

property in both recent reporting periods for the number to be included in the calculated property absorption rates. The one exception to this rule is for new properties that are completed and come online for leasing in the most recent half year.

In order to supplement the information that is directly received from the panelists, Center researchers also depend on business publications, public websites, and MLS data.

Classification

In order to compare similar spaces, the Center for Business and Economic Research has developed a classification system for office, office/retail, retail spaces and warehouses. These classes rate the quality of each building in terms of the following criteria: age, quality of construction, location, and included amenities.

Class A space represents the most prestigious buildings available in the Northwest Arkansas market. These spaces are new or newly renovated, made of the best quality materials, with brick, masonry, or glass exteriors. Class A buildings are located in highly accessible locations with easy access to major clients or customers.

Class B space includes buildings that compete for a wide range of uses, including much of the Walmart vendor community. These spaces have average range rents. The buildings are attractive, but not necessarily brand new, and have a lower level of material quality than Class A buildings. Many amenities are not included in the base lease price of Class B buildings.

Class C space is adequate for users that require functional space for their businesses, but not above average locations, materials, or amenities. These buildings are often older and have lease rates that are below average.
